ABOUT ME

Results-driven Web Developer and Magento 2 Specialist with 3+ years of hands-on experience building scalable B2B and B2C eCommerce platforms. Proficient in custom module development, REST API integrations, multi-store architecture, and performance optimization. Combines strong front-end skills (React.js, HTML5, CSS3, JavaScript) with deep Magento 2 expertise and end-to-end UI/UX design capabilities in Figma. Experienced with WordPress CMS, WooCommerce, and Drupal for diverse client web solutions.

MAGENTO 2 EXPERTISE

Architecture: Custom Modules, DI/di.xml, Plugins, Observers, Service Contracts, EAV

Theme & UI: Layout XML, UI Components, KnockoutJS, Theme Customization

Commerce: Checkout/Cart, Pricing Rules, Promotions, Multi-Store, B2B/B2C, Multilingual

APIs: REST API, SOAP, GraphQL, Custom Endpoints, webapi.xml, Plugins, Extensions

Performance: Core Web Vitals, Xdebug

DevOps: Composer, Git, CI/CD, Docker, Magento CLI, Cron Jobs

Integrations: Shipping, ERP/CRM, SMTP, Third-Party APIs

FRONT-END DEVELOPMENT

Languages: HTML5, CSS3, JavaScript ES6+, PHP

Frameworks: React.js, jQuery, Bootstrap, Tailwind CSS, LESS, SASS

Standards: Responsive Design, Cross-Browser

UI/UX DESIGN

Tools: Figma — Wireframing, Prototyping, Design Systems, Auto Layout

Methods: User Research, Usability Testing, User Flows, Info Architecture

Design: Visual Hierarchy, Typography, Color Theory, Component Libraries

PROFESSIONAL EXPERIENCE

Web Developer & UI/UX Developer

Aug 2023 – Present

Coditron Technologies, Pune

▪ Magento 2 / Adobe Commerce Development

- Developed and customized Magento 2 themes, layout XML, and UI components for multiple B2B and B2C eCommerce clients, delivering pixel-perfect storefronts.
- Built custom Magento 2 modules using plugins (interceptors), observers, and cron jobs, extending core functionality without modifying core files.
- Designed and implemented custom REST API endpoints via webapi.xml and service contracts for mobile app and third-party integrations.
- Integrated REST APIs connecting Magento 2 with shipping providers and ERP/CRM systems, streamlining order management workflows.
- Configured multi-store Magento 2 architecture with multilingual storefronts, shared catalogues, and independent regional checkout flows.
- Optimized site performance through Redis caching, Varnish FPC, indexer configuration, and Core Web Vitals improvements (CLS, LCP, FCP).
- Implemented a gamification reward-points system using custom UI components and layout XML, increasing repeat purchase engagement.

▪ UI/UX Design & Front-End Implementation

- Created end-to-end Figma design systems — wireframes, high-fidelity prototypes, component libraries, color tokens, and typography scales for Magento storefronts.
- Translated Figma designs into pixel-perfect, responsive front-end code using HTML5, CSS3, JavaScript, and React.js with full cross-browser compatibility.
- Collaborated in Agile sprints with QA, DevOps, and product teams; contributed to code reviews, design handoffs, and technical documentation.
- Managed and maintained content on WordPress and Drupal websites; implemented SEO best practices to improve organic search visibility.
- Configured SMTP services for reliable email delivery across WordPress and other web platforms.

UI Developer Intern

Mar 2023 – Aug 2023

Coditron Technologies, Pune

- Converted Figma and PSD designs into responsive, cross-browser HTML5/CSS3/JavaScript pages for Magento 2 and WordPress projects.
- Assisted with Magento 2 theme layout customization, XML configuration, and front-end component development under senior guidance.
- Redesigned legacy website layouts, improving navigation flow, visual hierarchy, and mobile responsiveness.
- Participated in design reviews, providing UI/UX recommendations that improved visual consistency across multiple client applications.

KEY PROJECTS

▸ B2B & B2C Multi-Store eCommerce Platform — Magento 2

- Led full Magento 2 development: theme customization, custom module development, REST API integrations, multi-store configuration, and checkout customization.
- Arranged multi-store architecture with EAV-based product catalogues; enhanced custom plugins, observers, for business-specific automation.
- Integrated payment gateways, shipping providers, and ERP/CRM systems via REST APIs; optimized Redis/Varnish caching and indexers for production performance.
- Managed complete Figma-to-code workflow: design system creation, high-fidelity prototypes, and pixel-perfect front-end implementation.

Gamification & Reward-Points Module — Magento 2

- Designed and expanded a custom Magento 2 reward-points module — custom UI components, layout XML, and customer account integration.
- Built REST API endpoints for reward data retrieval; integrated with third-party loyalty platforms improving user retention and repeat purchase rates.

Live: View Project →

Web & Mobile Application UI/UX Design

- Delivered end-to-end UI/UX design for multiple web and mobile applications — wireframes, interactive Figma prototypes, and full design handoff documentation.
- Produced user flows, information architecture diagrams, and design systems ensuring responsive, accessible interfaces across all screen sizes.

View: Behance Portfolio →

WordPress & CMS Multi-Site Development

- Created and improved custom WordPress websites with Elementor, WooCommerce integration, third-party plugins, and SMTP email configuration for multiple clients.
- Managed WordPress Multisite installations for centralized administration of multiple client websites, improving maintainability and deployment efficiency.
